

# The Tryall Club

## Environmental Policy

The Tryall Club is committed to the protection of the environment and the fight against climate change for the betterment of our members, guests, residents of Jamaica and our wider global partners. With these goals in mind, The Club is committed to taking action:

- To comply fully with all relevant environmental laws and regulations that governs our operations.
- To minimize our use of energy, water and scarce resources, air emissions, water effluent, solid waste and hazardous materials that impact the environment.
- To seek innovative and holistic ways of adapting to and mitigating the effects of climate change.
- To invite our members, guests, suppliers and contractors to be aware and engaged in sensitive environmental conditions and suitable actions that promote sustainability.
- To work with other stakeholders in the tourism industry, in public agencies and the community to achieve wider conservation and anti-pollution agendas.
- To provide all employees with the training and resources needed to meet goals and foster progress.
- To openly communicate our policies and practices to our employees, members, guests, and interested parties so that these may foster environmental awareness.
- To constantly monitor and record our conservation efforts, setting targets and plans that will ensure sustainability.
- To employ persons regardless of race, beliefs or gender so that the benefits of the Club's operations and programs may reach diverse communities.
- To give preference to local goods and services, wherever they promote our goals of waste reduction while providing eco-friendly alternatives.
- To perform an annual review of sustainability policies and procedures providing details of targeted continuous improvements that may be audited by Green Globe.
- To preserve national monuments on site in compliance with the standards of the Jamaica National Heritage Trust while fostering awareness of these heritage treasures with guests, members and the local community.
- To seek avenues of mitigating climate change, through greening efforts, which can further global environmental protection goals.
- To maintain our support of Outreach and Community Development projects piloted by the Tryall Club Teams (Tryall Fund, Sports Club and Green Team) to further the development of health and education in Jamaica.
